

Welcome to Module 3: Social Engineering!

You will be learning about social engineering. Specifically about how to prevent these attacks. From learning the basics of social engineering by the end of the module you are expected to be an expert. And as an added bonus you will take a closer look at how hackers use social engineering.

Here is the schedule of what you are going to learn in the upcoming lessons.

- What is social engineering
- Types of social engineering
- Phishing

There are going to be games that must be completed between some lessons. Make sure to memorize the videos to win. At the end there will be a quiz. Get an 80% or above to earn your certificate.
